SUMMARY

Board-certified pediatrician with 20+ years of real clinical practice and clinic operations experience in South Korea, including long-term daily EMR use and collaboration with EMR vendors. Hands-on Clinical Informatics builder who identifies real healthcare workflow problems, designs software to solve them, operates tools in real workflows, discovers the next bottleneck, and continuously improves the system.

CORE SKILLS

Clinical Informatics | EMR/EHR Documentation | Clinical Workflow Optimization | Healthcare Operations | Clinical Documentation & Data Integrity | Patient Data Management | Workflow Automation | Healthcare Technology Integration | Python | Flask | SQLite/PostgreSQL | REST APIs | Twilio | Google Calendar API | Telegram Bot API | Git/GitHub

PROFESSIONAL EXPERIENCE

JE The Line, LLC

Founder / Clinical Informatics & Workflow Automation Lead | May 2024 - Present

- Designed and developed a clinic workflow automation platform from real clinical workflow problems observed in practice.
- Built SkincareChart, a local-first Python/Flask/SQLite application for patient profiles, visits, notes, photos, documents, payments, and reporting.
- Developed Skmsg after operating SkincareChart revealed appointment communication and reminder bottlenecks.
- Created Telegram CRM Bridge after operating charting and messaging tools revealed staff lookup and controlled messaging limitations.
- Used Git/GitHub and Codex/ChatGPT-assisted development to implement features, debug integrations, refactor code, improve UI behavior, and document operations.

Tonton Children's Hospital, South Korea

Chief of Pediatrics | Mar 2024 - Mar 2025

- Led pediatric clinical operations with emphasis on standardized protocols, structured workflows, documentation accuracy, and patient follow-up.
- Maintained accurate clinical documentation to support data integrity, coordinated care, and operational consistency.
- Coordinated multidisciplinary care workflows and supported continuity of care across clinical teams.

CHA University Bundang Medical Center, South Korea

Pediatric Emergency Department, Attending Physician | Nov 2023 - Feb 2024

- Managed acute pediatric cases while maintaining accurate EMR documentation and clinical data review.
- Supported patient safety through continuous monitoring, data interpretation, and timely clinical decision-making.

Anapa Pain Clinic, USA

Medical Assistant | May 2023 - Aug 2023

- Entered patient data into EMR systems and maintained accurate records in a U.S. clinical setting.
- Coordinated scheduling, follow-up visits, referrals, and patient communication workflows.

Livingstone Medical Clinic, USA

Medical Assistant | May 2022

- Collected and documented patient data in EMR systems and supported patient intake and clinical workflow coordination.

JE Pediatrics, South Korea

Physician & Owner | May 2005 - Mar 2022

- Owned and operated a pediatric outpatient clinic, overseeing clinical care, documentation workflows, follow-up, and daily operations.
- Managed high-volume outpatient workflows including intake, visit documentation, treatment planning, follow-up tracking, and EMR-based care coordination.
- Collaborated with EMR vendors to improve documentation workflows, system usability, and operational efficiency based on daily clinic use.

CLINICAL INFORMATICS & DATA EXPERIENCE

- Developed structured clinical documentation workflows for patient records, visit history, treatment notes, clinical photos, consent documents, and payment-related data.
- Connected documentation workflows to appointment messaging using Google Calendar, Twilio SMS/MMS, multilingual templates, and Telegram staff confirmation.
- Built controlled messaging workflows using approved templates, confirmation gates, audit logging, token-protected APIs, and idempotency controls.
- Operated multi-service healthcare applications using local services, Railway deployment, PostgreSQL, Cloudflare/DNS configuration, health checks, restart workflows, and operational documentation.

TECHNICAL SKILLS

Python, Flask, SQLite, PostgreSQL, SQLAlchemy, JavaScript, TypeScript, HTML/CSS, REST APIs, Webhooks, Twilio API, Google Calendar API, Telegram Bot API, Railway, Cloudflare, Git/GitHub, Codex/ChatGPT-assisted Development

EDUCATION

MD, Dankook Medical School, South Korea

MS in Pediatrics, Dankook Medical School, South Korea

LICENSE & CERTIFICATION

Board-Certified Pediatrician, South Korea

Medical Doctor License, South Korea
