The Colony, TX | chlee4658@gmail.com

Physician | Clinical Informatics | Healthcare Workflow Automation | Healthcare Technology Builder

SUMMARY

Board-certified pediatrician in South Korea with 20+ years of clinical experience and hands-on Clinical Informatics experience building healthcare workflow automation tools. Experienced in EMR documentation, clinical workflow optimization, healthcare operations, patient data management, and technology integration. Designed and operated a multi-service clinic platform integrating patient charting, visit documentation, appointment messaging, Twilio SMS/MMS, Google Calendar workflows, and Telegram-based staff operations using Python, Flask, SQLite/PostgreSQL, Git, and AI-assisted development.

CORE SKILLS

Clinical	Pediatrics, emergency pediatrics, clinical documentation, EMR workflows, patient safety, care coordination
Informatics	Clinical Informatics, workflow analysis, workflow automation, healthcare operations, clinical data management
Technology	Python, Flask, SQLite, PostgreSQL, SQLAlchemy, JavaScript, TypeScript, HTML/CSS, REST APIs, Git/GitHub
Integrations	Twilio API, Google Calendar API, Telegram Bot API, Railway, Cloudflare, Codex/ChatGPT-assisted development

PROFESSIONAL EXPERIENCE

JE The Line, LLC

Founder / Clinical Informatics & Workflow Automation Lead | May 2024 - Present

- Designed and developed a clinic workflow automation platform integrating patient charting, visit documentation, treatment notes, photo/document management, appointment messaging, and staff notifications.
- Built SkincareChart, a local-first Python/Flask/SQLite application supporting patient profiles, visit history, treatment documentation, clinical photos, PDF consent documents, product/payment tracking, and operational statistics.
- Developed Skmsg, a messaging automation service integrating Twilio SMS/MMS, Google Calendar appointment data, multilingual templates, inbound replies, and reminder workflows.
- Created a Telegram-based staff operations bridge supporting customer lookup, booking lookup, approved-template messaging, confirmation gates, audit logging, and controlled workflow execution.
- Used Git/GitHub and Codex/ChatGPT-assisted development to implement features, debug integration issues, refactor code, improve UI behavior, document operations, and prepare for Windows deployment.

Tonton Children's Hospital, South Korea

Chief of Pediatrics | Mar 2024 - Mar 2025

- Led pediatric clinical operations with emphasis on standardized protocols, structured workflows, documentation accuracy, and patient follow-up.
- Maintained accurate clinical documentation to support data integrity, coordinated care, and operational consistency.
- Coordinated multidisciplinary care workflows and supported continuity of care across clinical teams.

CHA University Bundang Medical Center, South Korea

Pediatric Emergency Department, Attending Physician | Nov 2023 - Feb 2024

- Managed acute pediatric cases while maintaining accurate EMR documentation and clinical data review.
- Supported patient safety through continuous monitoring, data interpretation, and timely clinical decision-making.
- Reviewed patient information to ensure clinical accuracy and documentation completeness in emergency workflows.

PROFESSIONAL EXPERIENCE CONTINUED

Anapa Pain Clinic, USA

Medical Assistant | May 2023 - Aug 2023

- Entered patient data into EMR systems and maintained accurate records in a U.S. clinical setting.
- Coordinated scheduling, follow-up visits, referrals, and patient communication workflows.
- Supported continuity of care through organized documentation and operational support.

Livingstone Medical Clinic, USA

Medical Assistant | May 2022

- Collected and documented patient data in EMR systems.
- Recorded vital signs and assisted with routine clinical procedures.
- Supported clinical workflow, patient intake, and data organization.

JE Pediatrics, South Korea

Physician & Owner | May 2005 - Mar 2022

- Owned and operated a pediatric outpatient clinic, overseeing clinical care, documentation workflows, patient follow-up, and daily operations.
- Managed high-volume outpatient workflows including patient intake, visit documentation, treatment planning, follow-up tracking, and EMR-based care coordination.
- Collaborated with EMR vendors to improve documentation workflows, system usability, and operational efficiency.
- Implemented workflow-based approaches to improve documentation consistency, patient communication, and operational coordination.

CLINICAL INFORMATICS & DATA EXPERIENCE

- Developed structured clinical documentation workflows for patient records, visit history, treatment notes, clinical photos, consent documents, and payment-related data.
- Integrated appointment scheduling with automated communication workflows using Google Calendar, Twilio SMS/MMS, multilingual templates, and Telegram staff confirmation.
- Designed local-first data storage for privacy-sensitive clinic photos and documents while supporting optional cloud-based messaging services.
- Built controlled messaging workflows using approved templates, confirmation gates, audit logging, token-protected APIs, and idempotency controls.
- Operated multi-service healthcare applications using Mac mini local services, Railway deployment, PostgreSQL, Cloudflare/DNS configuration, health checks, restart workflows, and operational documentation.

EDUCATION

MD, Dankook Medical School, South Korea

MS in Pediatrics, Dankook Medical School, South Korea

LICENSE & CERTIFICATION

Board-Certified Pediatrician, South Korea

Medical Doctor License, South Korea
